Education

DePaul University

Jan 2024 – May 2026

- M.S. in Software Engineering – GPA: 3.43
- Areas of interest: Software Architecture, UI/UX
- Relevant Coursework: Data Structures, Data Systems, Human-Computer Interaction, Globally Distributed Software Systems, Software Testing & QA, OOP, Enterprise Programming, DevOps, Agile Development

Michigan State University

Aug 2018 – Dec 2021

- B.S. in Physics
- Relevant Coursework: Computational Modeling, Differential Equations, Matrix Algebra, Linear Algebra, Nuclear Physics, Quantum Physics

Work Experience

Software Engineer Co-op Assistant, Consumer's Energy

May 2026 – Present

- Develop and maintain enterprise applications using .NET, React, SQL Server, and REST APIs to support internal business operations and workforce management initiatives.
- Collaborate with software engineers, product managers, UX designers, and business stakeholders in an Agile environment to gather requirements, refine user stories, and deliver production-ready features.
- Contribute to the development of enterprise applications including an Absence Request App and Apprentice Task Log, improving employee workflows and reducing manual administrative processes, supporting over 4,000 users.
- Participate in code reviews, testing, debugging, and deployment activities to ensure application quality, maintainability, and performance.
- Utilize Azure DevOps, Git, and CI/CD practices to support development, release management, and team collaboration.

Projects

- **PathFinder (React, .NET, SQL Server, Azure)**. Developed a full-stack application that helps employees discover subject matter experts and professional connections. Built **React** frontend components and **.NET** backend services. Created search and discovery functionality to improve knowledge sharing and employee collaboration.
- **EduSummarize (FastAPI, Next.js, Python, JavaScript, GitHub Actions)**. Built a web application that transcribes and summarizes lecture videos. Served as Product Owner, Scrum Master, Tester, and Developer. Developed backend services with **FastAPI** and frontend features with **Next.js**. I wrote testing scripts and building, testing, and deployment automations in **GitHub Actions**.
- **Absence Request (React, .NET, SQL Server, Azure)**. Developed features for an internal employee absence management application. Collaborated with stakeholders to translate business requirements into scalable software solutions. Enhanced application usability through frontend and backend improvements.

Extracurricular Activities

Campus Commissioner, LUG Sports Group

Aug 2021 – Mar 2022

- Recruited and onboarded over 150 members for ice hockey league through social media outreach and an Instagram ad campaign.

President, Sigma Nu Fraternity

Jan 2020 – Jan 2021

- Increased membership by 15% during the Covid-19 pandemic by implementing virtual recruitment strategies and overhauling the chapter's website and social media accounts.
- Increased fundraising by 20% during the Covid-19 pandemic by hosting a virtual run/walk, creating GoFundMe campaigns, strategically delegating members, and establishing strong community relationships.
- Erased \$49,000 in inherited debt by developing an incentive program to influence payment of chapter fees and creating a new budget plan.

Skills

- **Languages:** Java, Python (ML, AI Integration, Data Analysis), C#, C, C++, JavaScript, TypeScript, R, SQL
- **Web Development & Frameworks:** .NET, React, Tailwind, FastAPI (Python), Thymeleaf (Java), RESTful APIs, Postman, Bruno, HTML/CSS, Figma
- **DevOps & Cloud Technologies:** Docker, Azure DevOps, Cloudflare, Vercel
- **Data Tools:** MySQL, SQL Server
- **Project Management:** Jira, GitHub, Miro, ADO
